

BIG NUMBERS

Video transcript

What do you do with the waste from 140 million tons of food.

19,000 farms.

17,000 wastewater facilities.

And 4,400 landfills.

If you're NW Natural you turn it into Renewable Natural Gas.

Because our goal is to provide energy with a cleaner future.

To get there, we're creating Renewable Natural Gas for our customers that will greatly reduce waste and lower carbon emissions.

Your favorite energy is becoming renewable.

NW Natural. Less we can.
