

We have the cure for the common cold house.

**It starts with a high-efficiency
natural gas furnace or fireplace.**

With current cash incentives, there's no better time to upgrade your heating system. Enjoy more comfort, more efficiency and more savings. New equipment can also reduce your home's carbon emissions.

NW Natural[®]

Why natural gas is still the best way to heat your home

- Provides fast, consistent heating
- Heats your home more affordably using less energy
- Natural gas fireplaces can work if the electricity goes out
- Can lower your home's carbon emissions. Learn more at LessWeCan.com

Visit nwnatural.com/Offers to start your heating upgrade.

*Incentives are available when you work with a NW Natural Preferred Contractor or Preferred Hearth Retailer to install qualifying equipment. Energy Trust incentives are subject to funding availability and may change. Qualifications apply.
