

Ways to Save: More comfort, less impact. You can rely on high-efficiency natural gas appliances.

Natural gas is already the affordable way to heat your home and water, and cook your food. Newer high-efficiency natural gas appliances can help lower your energy bills—and household carbon emissions—even more, especially with help from limited-time cash incentives.

- You can receive **up to \$400** when you upgrade to a high-efficiency natural gas furnace. (Incentives are available for rental property owners, too.)
- Receive **up to \$400** back when upgrading to a high-efficiency natural gas fireplace.
- Federal tax credits may also be available. Why schedule now? Heating and cooling contractors may

have more flexible schedules, helping you install upgrades before fall kicks in.

Incentives are available when you work with a NW Natural Preferred Contractor or Hearth Retailer

when installing natural gas equipment. **NW Natural Preferred Contractors have also implemented additional safety practices and social-distancing guidelines.** Qualifications apply.

Partner in Safety: PSU study finds our system potential resource for resilience in disasters

Did you know our natural gas system could be helpful in earthquake recovery? A new study by Portland State University's Center for Public Service, conducted in partnership with

NW Natural, finds that the regional natural gas system could provide a transportation sector backup that would be helpful for post-disaster recovery plans.

We have the most modern pipeline system in the nation, and one of the most proactive safety programs in place to protect it.

"What we found was that the natural gas system is distributed both in terms of generation and storage, making a strong case for it to be evaluated as a low-cost, low-risk system," said Hal Nelson, assistant professor of public administration at Portland State and the faculty adviser on the study.

"This is a new way of thinking about post-disaster infrastructure."

HOME, SAFE AND SOUND

NW Natural continually coordinates with other regional organizations and agencies as part of a statewide earthquake preparedness effort. But emergency preparedness doesn't stop with us. You can take additional precautions with your natural gas appliances and equipment, too. See our emergency preparedness tips and other safety best practices at nwnatural.com/Residential/Safety.

More Convenience Coming to a Screen Near You:

One dashboard for all your account-management needs

When you sign into our new website later this year, you'll see enhancements designed to give you the best NW Natural experience on every device. In addition to improved responsiveness, security and self-service options, a central account dashboard lets you easily manage program enrollments, track energy use and more.

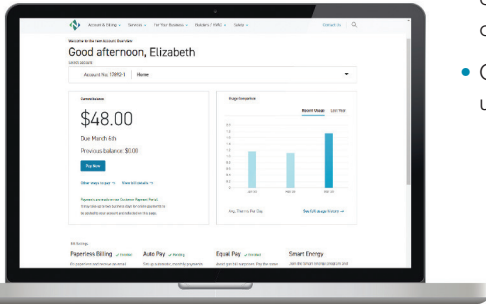

Everything in one place

From your account dashboard, you'll be able to:

- Toggle between multiple accounts in a dropdown menu
- Label your accounts for easy identification
- View your account balance, due date, billing-setting status, gas-use comparison all on one screen
- Compare your current month's gas use with last year's use in a single click

- Quickly access and download 14 months of gas-use history
- Conveniently view your enrollment and account-management options
- Pay your bill online with one click

You don't have to wait for our new website to start managing your account. Set up your online profile today at nwnatural.com. (Your account and profile setting will migrate to the new site.)

Renewable Natural Gas: Energy reimagined

We're putting organic waste to good use while reducing carbon emissions.

Renewable natural gas is made from organic materials like wood, food and even human waste, and can be delivered through our existing pipeline to your home or business.

Visit LessWeCan.com to see how we're turning waste into reliable energy.

We're Here to Help

Please contact us today if you need payment assistance or to make payment arrangements. Call us at **800-422-4012**, 7 a.m. to 6 p.m., Monday through Friday.
